Comstice

Bulk Reskilling

Data Sheet

Why Bulk Reskilling

One of the biggest challenges in most of the contact centers is the intra-day resource management. Comstice Bulk Reskilling tool helps to reassign a high number of agents into different skills and teams.

Business Benefits

Comstice Bulk Reskilling has many benefits including;

- avoiding human errors on reskilling
- faster reskilling of high number of agents
- higher agent occupancy
- instant intervention in case of long wait times

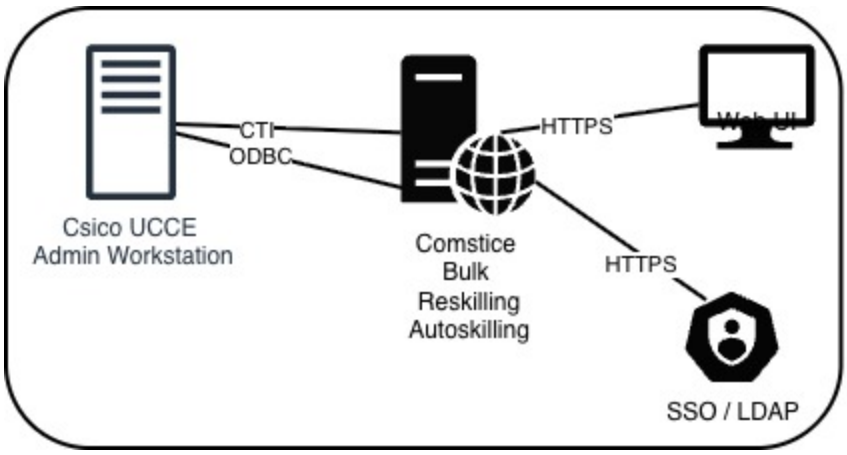

Features

- Upload CSV with Agents, to Add and Remove skills in one click
- Copy One Agent's Skill Set into a Group of Agents
- Schedule Skill Updates
- Add a Group of Agents to a Skill
- Save Bulk Updates as a Template
- Change Log to see the changes done by each user
- User Permissions for supervisors and workforce management specialists
- Agent Skill Map: List of current skills for selected agents as a report

Solution Topology: UCCE

Comstice Bulk Reskilling tool communicates with Cisco UCCE Admin Workstation and Cisco CUCM for login authentication. It also supports single sign-on with Microsoft Entra, Okta and Google Workspaces.

It retrieves the agent, skill and other configuration details from UCCE AW Database. It also uses UCCE Configuration APIs provided by Cisco to reskill the agents and reassign them to different teams if needed.

Resource Requirements and Pricing

On-Premises

If the solution will be hosted on-premises, you can provide a vanilla VM with LinuxOS. Comstice applications run on Linux VM as Docker containers or using Kubernetes. Comstice engineers will configure the VM over a webex session.

Minimum Hardware Requirements

LinuxVM, 16GB RAM, 4 x vCPU, 100GB HDD

Minimum two servers required for high availability.

Cloud-Hosted

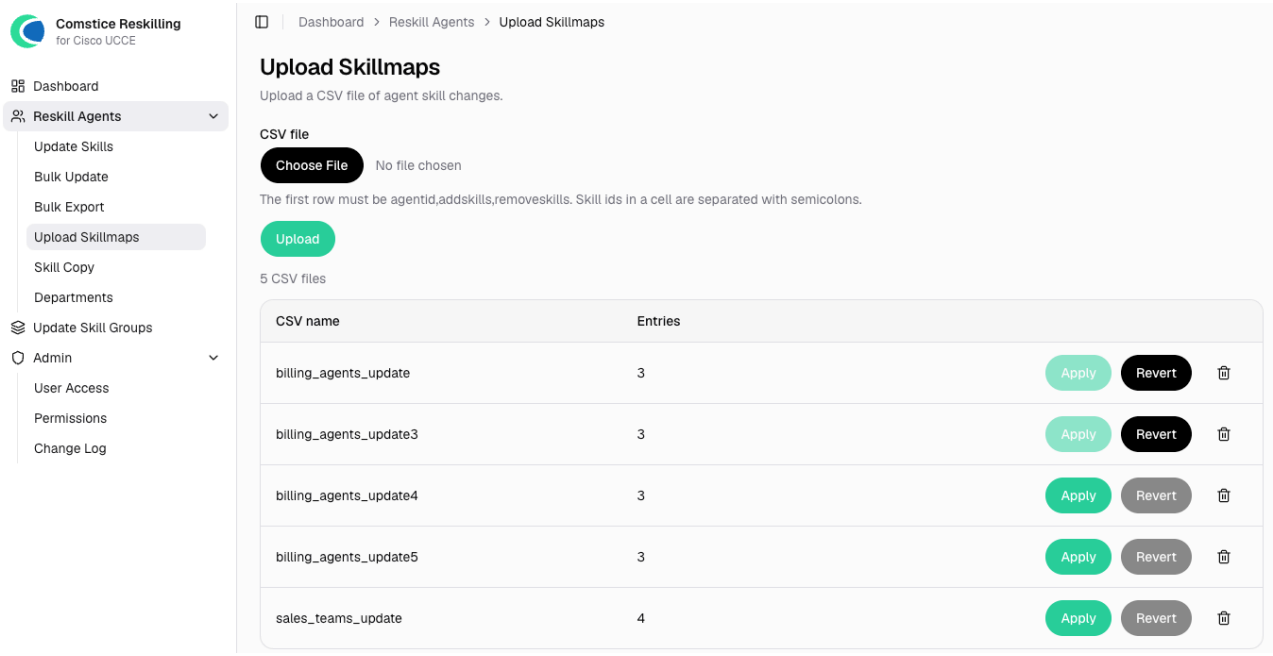

Comstice also offers a cloud service that is SOC2 and ISO27001 certified.

Pricing

Pricing is based on the number of agents to be reskilled. It is not a per-agent price; it is a tiered model.

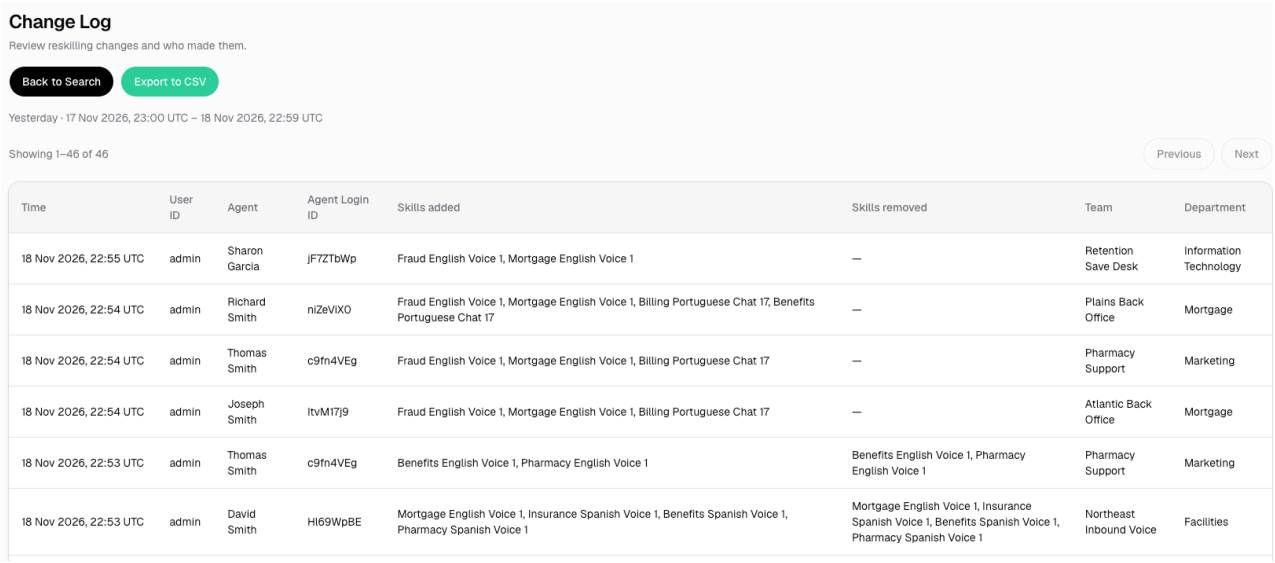

Web User Interface

Web user interface offers access to all the features listed. User permissions will restrict the agents and skills each user can modify using Bulk Reskilling Tool.

Change Log

One of the most important points in reskilling is the change log. Comstice offers a comprehensive change log that you can monitor the reskilling activity by each user;

Change Log

Review reskilling changes and who made them.

Comstice Autoskilling

Comstice also offers autonomous intraday workforce management tool called Comstice Autoskill. Users can create a logical flow of reskilling criteria and Autoskill can reskill the agents when the conditions are met i.e. high wait times on certain skills, low agent occupancy on other skills etc.

Once the conditions are no longer valid, Autoskill reverts the changes back automatically.

Support

Comstice offers a break-fix support for all the solutions. Priority support is included in all the subscriptions as long as the solution is deployed with N+1 redundancy. SLA is one hour response and up to four hours fix, based around all the depedencies of each solution. Support is available 24/7. Tickets can be raised by the client's IT personnel that has already followed the troubleshooting steps provided during the Administrator Training delivered as part of the project. Comstice does not accept tickets directly from the end users.

Tickets can be opened from https://comstice.com/support, by sending an email to support@comstice.com , SMS text, WhatsApp from comstice.com or by calling +1 713 929 3714 (Option 2)

Questions regarding model training will be handled during office hours.. Only break-fix support is handled on the SLA with 24/7 coverage.
